Terms of Use for TailorMate

Last updated: 02/11/2026

These terms are between you and gitsystemng ("we", "us") for use of the TailorMate application (the "App"). By creating a shop account, you agree to these terms and to the Privacy Notice.

1. The service

TailorMate is a tool for one fashion shop to keep clients, measurements, jobs, payments, expenses, and a style catalogue. One login is one shop. We provide the App. You provide the information you enter and you decide what to do with it.

2. Who may open a shop

You must be 18 or older. You must give a working email, a shop name, a phone number, and the Nigerian state where the shop is. You are responsible for keeping your password private and for what is done with your login.

3. Your clients

You are the data controller for the clients you enter. We store that information for you. You must tell each client that their details and measurements are kept in TailorMate, including on servers outside Nigeria, and how they can ask you for a copy, a correction, or deletion.

You must have a proper reason to enter a client's information. Do not enter information about a person who has asked you to delete it, except where the law requires you to keep a record.

4. Trial, subscription, and catalogue

A new shop can use TailorMate for the trial period shown in the App. After that, the shop stays open while the subscription shown in the App is paid. The price, the number of days, and the catalogue pack price are the figures shown in the App at the time you pay. Payments are taken by Paystack. We do not store your card number.

A paid period is for access to the App. If a payment fails, or the paid period ends and is not renewed, the shop can be closed until it is paid again. Fees are not refunded except where the law requires a refund, or where we took a payment and could not provide the paid period.

5. Inviting another shop

A shop may share an invite code. If a new shop enters that code, pays the monthly plan, and an admin approves the reward, the inviting shop can receive one free month of TailorMate. Approval is not automatic. The free month is use of the App. It is not a cash payment, and Paystack does not split the new shop's fee.

A salesperson code is separate. Any cash commission for a salesperson is set by the admin and paid outside the App.

6. Acceptable use

Use the App for a real fashion shop. Do not break the law with it, attempt to open another shop's records, interfere with the service, or upload anything you do not have the right to store. Catalogue

photos should be of clothing, not of people, unless you have the person's permission.

We may suspend or close a shop that breaks these terms, that we must close to protect someone, or whose subscription has ended.

7. Your records

Check names, measurements, dates, and amounts before you rely on them. WhatsApp and email delivery depend on those services, not on TailorMate. You can download your records from More, download one client's file from that client's page, and erase a client. Archive only hides a client.

Deleting the shop account removes the login, the shop, clients, measurements, jobs, payments, expenses, the logo, catalogue photos, and feedback sent from that login. Paystack and our host may keep their own payment or backup copies for their own periods.

8. The software and your content

TailorMate, its name, and its software belong to gitsystemng. The client records, photos, and shop details you enter stay yours. You give us permission to host, back up, and display that material so the App can run for your shop, and to remove it when you erase it or delete the account.

9. Availability and liability

We aim to keep TailorMate available, but we do not promise that it will be uninterrupted or free of faults. Maintenance, hosting, and failures in Paystack, email, or WhatsApp can interrupt it.

We are not liable for a loss of profit, a lost order, or a measurement or balance that you did not check, except where the law does not allow that limit. Nothing in these terms limits liability for fraud, or for death or personal injury caused by negligence, or any other liability that Nigerian law does not allow us to limit. Where a limit is allowed, our total liability to a shop in a month is the subscription fee that shop paid us for that month.

10. Changes

We may update these terms. The date at the top will change, and the new PDF will replace this one. If you keep using the App after the update, the new terms apply. If you do not agree, delete the account.

11. Law

These terms are governed by the laws of the Federal Republic of Nigeria. The courts of Nigeria may hear a dispute about them.
